- C
- DSA

PROJECTS

- **WEB APPLICATION BASED DIGITAL DICTIONARY**

Creating a dictionary website is an exciting web development project that requires a good balance of front-end and back-end skills.This project is mainly for the development of special dictionary which show the meaning of the any given words and also write in three different language of the same words.It also show the some special properties of the words like synonyms,antonyms,part of speech,image,scientific name,pronunciation and form one sentence regarding the word.
